

# INTEOS<sup>®</sup> - Clavicle System 3.5

Innovative fixed-angle polyaxial Clavicle System

# Advantages of the INTEOS® Clavicle Plate 3.5

The INTEOS® Clavicle plate showcases the latest findings in the repositioning and stabilising of fractured clavicles, based on the tried-and-tested **fixed-angle & polyaxial** plate-screw-connection from Hofer-medical.

## Product features

- the plate design and geometry are built on over 100 precisely measured clavicles
- precise anatomical plate prototype for best results
- fixed-angle and polyaxial holes for optimized screw placement
- optional minimally invasive aiming device available
- minimized screw head protrusion in order to avoid irritation

## Screw features

- compatible INTEOS® 3.5 mm locking screw
- Multi-directional, rounded screw head with locking function (fixed-angle & polyaxial)
- non-invasive screw tip
- „stick fit” - the stable INTEOS® connection between screw and screwdriver blade
- ForceDrive No 10 - screwdriver technology

INTEOS® - the multidirectional locking screw standard for the small fragment system 3.5

## creating partnership

For us, a partnership is the result of a long and happy relationship in all areas of our work. Reliable bone healing for patients, optimal handling of the systems for surgeons and surgical personnel, as well as the simple preparation of the instruments, constantly strengthen this partnership.

For us, "creating" means more than just finding solutions in the form of innovative products.

It is the result of high standards, constant development, innovative products and excellent service for patients, surgeons and surgical personnel around the clock.

Please do not hesitate to contact us if you have questions about our company, our employees or our production methods.
